Agile Actions,
Swift Travel,
and Compactness

SuperEX EX60

The Hitachi EX60, compact with modern appearance, brings agility and swift travel to the job ... for the particularly strong demands of urban job sites. Three-speed travel, operating ease and convenience, riding comfort, and quiet operation. All come from traditional Hitachi design.

The operator-friendly cab keeps the operator feeling relaxed. Fuel-efficient operation enhances operating economy.

The EX60 has been designed to harmonize man, machine and environmental awareness, the result of Hitachi's uncompromising dedication to the next-generation machine.

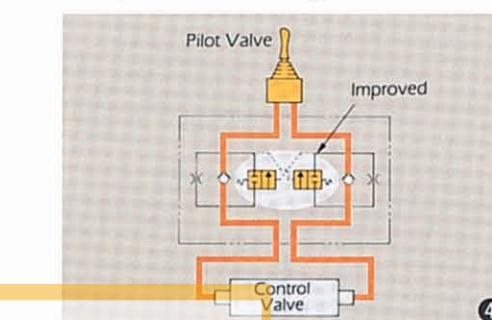

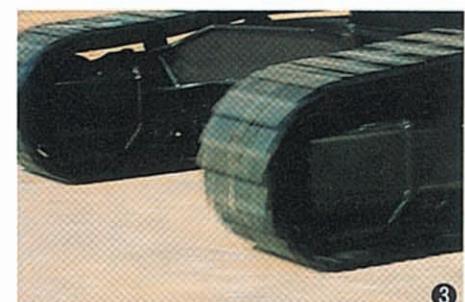

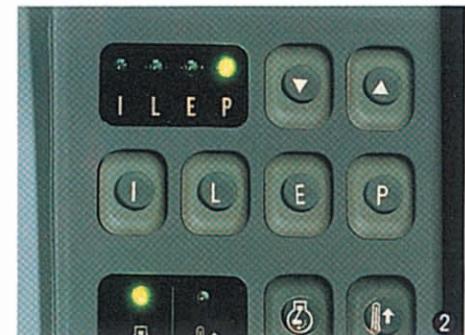

① **Small turning radius** means increased mobility. This gives the footwork of a town machine. Front-end turning radius is 1.70 m (5'7"), and rear-end turning radius 1.75 m (5'9"). Both are the minimum in this class.

② **Work mode selector** gives a choice of P (Power) mode, E (Economy) mode and L (Light-duty) mode, at one touch of a switch.

③ **Three-speed travel**, with ample traction force from the rugged undercarriage. Fast speed is 5.0 km/h (3.1 mph), and slow speed 2.5 km/h (1.6 mph).

④ **The advanced shockless valve** allows smooth starts and stops of travel, swing and front action. This shockless valve automatically actuates in response to travelling load.

- Auto Idle is provided for fuel-efficient, low-noise operation during idling.
- Extra port is provided as standard for use with special attachments.
- Quick warm-up system for pilot circuits to allow quick starts in cold weather.
- Hydraulic warm-up control system for engine and hydraulics.
- Openable right-side cab window
- Pilot-control shut-off lever to avoid mishandling when getting in and out of the cab and when not in use.
- Bucket clearance adjust mechanism

First-class Performance . . . Based on Hitachi Technology

① The cab seals out dust and noise.

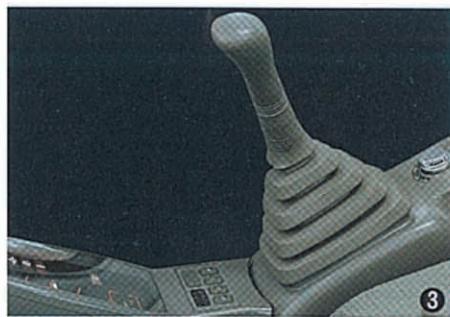

Shock-absorbing rubber mounts are upgraded to further dampen shocks and vibration. That keeps the operator feeling secure.

② The operator seat glides alone or together with the levers and monitor to fit the proportions of the operator. This is called Hitachi's *Sliding Cockpit*.

③ Lever grip is designed by ergonomics. Grip and feel it as part of your hand.

④ Easy-to-read curved monitor with finger-touch resin-molded switches for dust protection.

⑤ Operator comfort means increased production. A quality air conditioner using freon substitute and hot-and-cool box (optional) maintain operator comfort all year round.

⑥ The larger LC undercarriage is optionally available for higher stability when needed.

Undercarriage length: 2 855 mm
(9'4")

Undercarriage width: 2 300 mm
(7'7")

⑦ The strengthened blade is optionally available for increased lift and jackup force. This is designed for power and efficiency.

⑧ Short-pitched rubber crawlers are optionally available to protect paved surfaces from damage and enhance riding comfort. The rubber crawlers are interchangeable with steel ones.

⑨ The quiet, fuel-efficient engine with less exhaust gas, reflecting Hitachi's environment-friendly design policy.

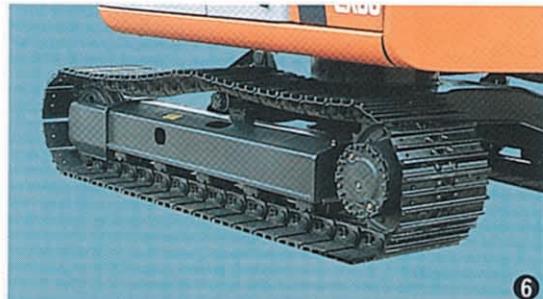

⑩ Monolithically cast bucket link A, with high resistance to torsion and strain, allows the EX60 to work hard.

⑪ Seat belt is provided as standard.

⑫ Travel piping is housed inside track frame. No projections to be damaged.

⑬ Generous tool box, the largest in this class, can hold a 20-liter (5 gallon) oil-can and tool kit.

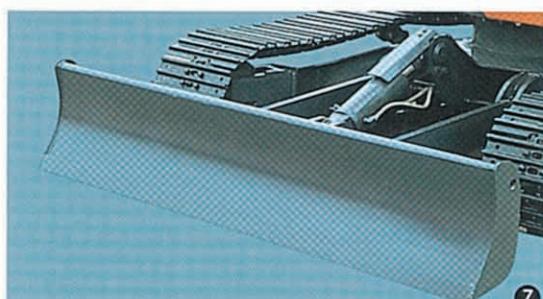

⑭ Wave-finned radiator is easy to maintain, and can reduce clogging significantly.
